SAMPLE HEALTH INSURANCE POLICY

CLAIMCOURT DEMONSTRATION DOCUMENT | FICTIONAL INSURER

IMPORTANT: This is a fictional policy created only for software testing and demonstration. It is not an actual insurance contract, does not describe any real insurer's terms, and must not be used to make real coverage or legal decisions.

Policy overview

Fictional insurer: Northstar Health Assurance (NHA)
Product: Northstar Individual Health Cover - Demo Plan
Sample policy number: DEMO-NHA-2026-00421
Policyholder: Alex Sample (fictional person)
Policy period: 1 January 2026 to 31 December 2026
Sum insured: INR 500,000
Document version: 1.0 - prepared for ClaimCourt testing

1. Definitions

Insured person: The individual named in the policy schedule and accepted for coverage by NHA.
Pre-existing disease: A disease, condition, ailment, or injury that was diagnosed by a physician or for which medical advice or treatment was recommended or received before the policy start date.
Waiting period: A specified period beginning on the first policy start date during which coverage for a stated category of condition is restricted.
Medically necessary treatment: Treatment that is appropriate, consistent with accepted medical practice, and not primarily for convenience.

2. Pre-existing disease waiting period

Pre-existing diseases are covered after a waiting period of 36 months of continuous coverage, provided the policy has been renewed without a break and the condition was disclosed as required during proposal review. Claims arising from a pre-existing disease during this waiting period may be declined under this clause.

3. General coverage

Subject to the terms, limits, exclusions, and conditions of this sample policy, NHA covers eligible in-patient hospitalisation expenses that are medically necessary and supported by itemised bills, discharge summaries, and relevant medical records. The policy schedule and endorsements form part of the contract.

4. Permanent exclusions

The following expenses are not covered under this sample plan: treatment for cosmetic purposes unless medically necessary following an accident or disease; experimental treatment not accepted by the applicable medical authority; and expenses incurred for services that are not medically necessary. An exclusion must be read together with any applicable endorsement and the policy schedule.

5. Policy continuity and renewal

The policyholder may request renewal before the policy expiry date. Continuity benefits apply only when renewal is completed within the permitted renewal period and the policy has not lapsed. The policyholder should retain renewal receipts and updated schedules as evidence of continuity.

6. Claim submission requirements

A claim submission should include the claim form, identity and policy details, original or valid digital hospital bills, payment receipts, discharge summary, investigation reports, and prescriptions relevant to the treatment. NHA may request additional documents reasonably connected to the claim. A request for documents should identify the information required.

7. Claim decision and communication

When a claim is declined in whole or in part, NHA will provide a written communication stating the reason or reasons for the decision and identifying the policy clause or condition relied upon. The policyholder may submit a written request for reconsideration with supporting documents.

8. Grievance process (fictional demo wording)

A policyholder who disagrees with a claim decision may first submit a grievance to the insurer's Grievance Redressal Officer. The grievance should include the policy number, claim reference, a short description of the disagreement, and supporting records. The insurer will acknowledge the grievance and communicate its response using the contact details in the policy schedule.

9. Interpretation and limitations

This document is intentionally incomplete and fictional. It does not specify every term that may appear in a real health insurance contract. Where this document is silent, no coverage, exclusion, time limit, statutory right, or regulatory requirement should be inferred. The ClaimCourt demo should treat missing information as unknown and should not invent policy wording.

End of sample policy. All names, policy numbers, insurer details, and contract wording are fictional.
